

BLUES on FIRE is a powerful and raunchy five-piece Blues Rock Band featuring a female vocalist, lead guitar, keyboards, bass and drums. We were just breaking blues ground as the pandemic hit , but after a bit of chopping and changing and some line -up changes were still fired up and passionate about our music.

Fast forward to 2025 and whilst we plan to develop some original material, our set list has grown much longer and broader and includes many timeless blues standards as well as some lesser known tunes all performed with that classic Blues on Fire passion.

Bluesy vocals continue to be complemented by some wicked blues riffs as well as the deep humming bass , and keys and drums also add their individual distinctiveness to make this a truly impressive 5- piece band.

Sharing a common love of rock and blues, each member is a talented and accomplished musician in their own right, with a wealth of gigging experience.

Everything we play is based in Blues and covers a mix of Blues and Blues Rock from Muddy Waters, Eric Clapton, Bonnie Raitt, Etta James, Tradesky Trucks Band, Chuck Berry, Joe Cocker, and Gary Moore as well as many other great artists . We love adding our own take on some timeless rock and blues classics and so most will sound a little different.

But please.... don't expect the same old covers, our set features a wide spectrum of music, you might have heard some of them before, you might even know a few of the lyrics, but you can be certain that we'll have you tapping your feet and desperate to play that air guitar or piano before the night is done.
